DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 2 recites the limitation whereby, "said pressurization assembly is integrally formed with said container." No support for this limitation could be found in Applicant's disclosure. While it is noted that page 11, lines 2-4 recites that the pressurization assembly is operatively associated with the cryogenic fluid source, and preferably with the container, this is insufficient support for the claim because being operatively associated with the container is not deemed equivalent to being integrally formed with the container. Furthermore, it is noted from the specification that the pressurization assembly comprises at least one pressurized fluid source and may further comprise a pressure regulator, but there is no written description in the specification that would enable any person skilled in the art to form these components integrally with the container. This rejection may be overcome by showing where the limitations of the claim are supported in the specification.

Allowable Subject Matter

3. Claims 1 and 3-8 are allowed.

Response to Arguments

4. Applicant's arguments, filed 04 February 2005, with respect to the rejections of claims 1 and 3-8 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 and 11 of US 6619048 B1 (Gonzalez), have been fully considered and are persuasive in view of the terminal disclaimer filed with Applicant's arguments. These rejections of claims 1 and 3-8 have been withdrawn.
5. Applicant's arguments, however, fail to address the rejection of claim 2 under 35 U.S.C. 112, 1st paragraph. Therefore this rejection has been repeated.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
